

MESL's Response to the COVID-19 Pandemic

At Mainstream Energy Solutions Limited (“MESL”) the well-being of our employees, clients, stakeholders and their families as well as the communities within our operating areas is of the highest degree of importance to us. We are concerned about the impact of the COVID-19 pandemic across the globe. Which is why we deem it appropriate to play our part in curbing the spread of the disease.

In order to best serve our clients and stakeholders as well as navigate these challenging times, we are taking steps to manage and respond to the evolving situation, to ensure minimal disruptions to the quality of service provided by MESL to the Nigerian Public. MESL is mindful of its strategic role in the country and will work to ensure optimal service delivery during this period.

To this effect, we have put in place preventive measures as recommended by the global and local authorities, as well as health and safety practices for all clients, employees, contractors, other stakeholders at all our locations. Additionally, we have developed a comprehensive plan for our essential staff to continue to perform their respective functions on-site whilst observing social distancing measures. All our non-essential staff have however been asked to work from home and can be reached via phone or e-mail.

We will assess the local conditions as communicated by the authorities and continue to monitor updates and recommendations from the World Health Organization, the Nigeria Center for Disease Control and take actions in line with the same.

Whilst we acknowledge that these are challenging times, which will impact our daily personal and business lives, the Board and Management of MESL would like to reiterate the company's commitment to fulfilling its mandate to generate and deliver electricity in a safe, reliable, efficient and most environmentally sound manner.

Thank you for your unwavering support.

Signed,

Management
